

Semantic clusters from GO terms (top 15)

- | | | | | |
|--|---|---|--|--|
| Trans-synaptic neurotransmission across modalities | Synaptic & neuron-glia communication | Nervous system & CNS development | Synaptic modulation & plasticity | Pre- & postsynaptic junction organization |
| Neural lineage specification & maturation | Axon & dendrite outgrowth & guidance | Plasma membrane-bounded cell projection morphogenesis | Synaptic structure & receptor regulation | Regulation of synaptic membrane potential & depolarization |
| Assembly of cell-cell junctions | Assembly of pre- & postsynaptic specializations | Inorganic anion & chloride transmembrane transport | Chloride & inorganic anion transport | Neurotransmitter receptor signaling via GPCR & channels |
